## THE PRIDE OF JAPAN

Since our founding in 1958, we at Hayabusa have provided the world with outstanding fishhooks, and manufactured uncompromising products with the functionality, convenience, durability and even the feel and style that our customers demand.

To win the satisfaction of our customers, we faithfully abide by Japanese principles of craftsmanship – never giving up, and doing everything possible.

Going forward, we will continue to deliver even more outstanding products for better fishing, never forgetting our pride as a high-grade fishing hook manufacturer representing Japan.

### PROFILE

---

- Capital : ¥50 million
- Company established : Apr. 1970
- President : Yumi Shida
  
- Primary brands :

  - Hayabusa : Fishing hooks, rigs, lures, squid jigs, metal jigs
  - Onigake : Fishing hooks
  - FINA : Worm hooks, lures, jig heads
  - FREE KNOT : Apparel

### ORIGIN OF THE COMPANY NAME

---

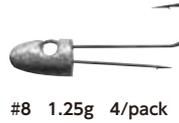

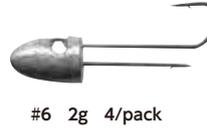

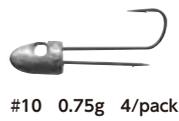

The "Hayabusa" name comes from the founder Hayato Tajiri. The first kanji character of the first name of the late Hayato Tajiri (formerly a corporate adviser) can be read "Hayabusa," which means a peregrine falcon which is a bird of prey. He was himself an enthusiastic angler – so enthusiastic that he commercialized sabiki rigs. The name Hayabusa came from the desire to be like a hayabusa of the fishing industry, attacking boldly by using speed, and flying as the pioneer of the times.

**BASS / PREDATOR**

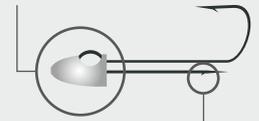

**MODEL HPJ215 QUICK SPEAR**

ART No. EX215 BLACK NICKEL

● **HPJ215 QUICK SPEAR** ●

**Bullet Head**  
made possible to achieve steady swimming action.

● **Quick Spear System** ●

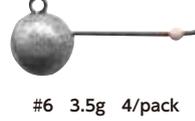

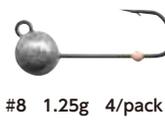

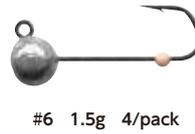

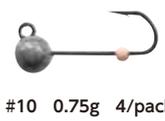

**Easy and Speedy Setting**

Super easy and fast to set a plastic worm straight!!!

**MODEL HPJ211 MICRO JIGHEAD ROUND**

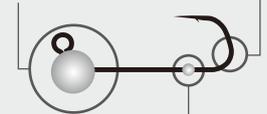

ART No. EX211 BLACK NICKEL

● **HPJ211 MICRO JIGHEAD ROUND** ●

Multi-purpose  
**Round Head**

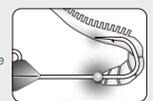

**Original Bend Curve**  
holds plastic worm even without any keeper and locks fish mouth.

**Luminous Bead**  
Luminous bead is designed to be used with clear or natural colors worms. Glowing from inside, it strongly appeals to fish.

**Best Settings with Best Ideas**

Setting hook, as shown in the picture, made possible to hold tight even 2~3 inch plastic worm.

# TBL930

- ART No. EB93011 NICKEL
- ART No. EB93071 BLACK NICKEL
- ART No. EB930L1 NON REFLECTIVE BLACK

**Center Balanced Eye**  
Offers stable lure swimming action, for optimum hooking position at all strikes.

**Hi-Carbon Steel**  
Top-quality Japanese-made carbon steel, contributing to sharp and tough hook tips and dependable strength.

**Forging**  
Forged hook wire ensures higher resistance against vertical opening.

**NRB coat** NRB, Non-Reflective-Black is HAYABUSA original fluorine coating which dramatically enhances hook-set performance for the smoothness in penetration.

**Sharp Point**  
The 4.5 straight sharpened point strikes a fine balance between razor-sharp penetration and take-no-chances strength.

**Round Bend Gap**  
Superb hooking performance and firm grip once fish are on the line.

# Jack eye

OFFSHORE

## JACK EYE SLOW

ART No. FS424

Jack eye SLOW supports a jerk action using the repelling power of the rod. It is a characteristic of slow jigging. Immediately after jerking, it faces to the side, leading to the subsequent fall. It also falls in a zigzag pattern while wobbling just like a tree leaf. The fall position and the powerful flashing of holograms increase the chance of a bite.

MODEL

# RAMBU V3 RATTLE

ART No. FS509

**RAMBU V3** was designed to achieve attractive steady diving and brisk sliding actions!  
**Built-in V3 FLASH**, on the belly and hind edge, makes squid crazy!!! This is a hi-spec model for modern anglers confronting tough conditions.

**Fixed Line Eye**

Fixed Line Eye is set for anglers to perfectly control over the lure. It also avoids an inefficient action to achieve a brisk dart action.

**Ride-on Sinkers**

Ride-on Sinkers makes it possible to long casting and attractive falling positions.

**V3 RATTLE**

V3 rattle creates a high appeal sound and it is perfect for low-light or deep water situation where the water visibility is minimal.

**Mighty Hook**

The primary feature of this hook design is to have a wide gape for the best hook up without losing strength.

**V3 FLASH**

V3 Flash on the belly and hind edge reflects light mysteriously. It makes a strong appeal to squid.

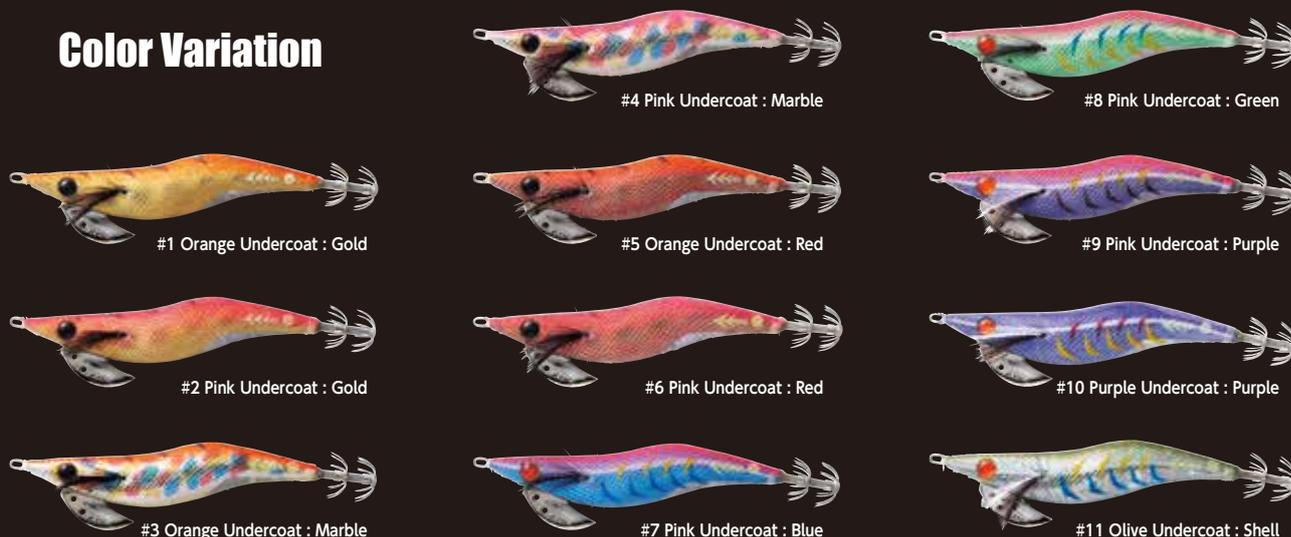

Size	Sinking Speed (sec.)	Weight	Body Length (mm)
3.5	approx.3.2sec/m	19.0g	105
3	approx.3.2sec/m	14.5g	90
2.5	approx.3.5sec/m	11.0g	75

**Slim & Edgy Body**

The Slim & Edgy Body creates long darts even with a light action through a wide range of water.

### ORIGIN OF THE COMPANY NAME

The "Hayabusa" name comes from the founder Hayato Tajiri. The first kanji character of the first name of the late Hayato Tajiri (formerly a corporate adviser) can be read "Hayabusa," which means a peregrine falcon which is a bird of prey. He was himself an enthusiastic angler – so enthusiastic that he commercialized sabiki rigs. The name Hayabusa came from the desire to be like a hayabusa of the fishing industry, attacking boldly by using speed, and flying as the pioneer of the times.

# BASS / PREDATOR

## MODEL WRM136 WEEDLESS SP

The remarkable feature of this hook are, the balance of gape width and the length of shank, the thickness of wire, and extra strong hook point. Plastic worms sliding down the hook shank was a problem with regular straight hooks, but adoption of loop stopper resolved it. Also, anglers became able to switch a plastic worm to another one without tearing it. Perfect closure on the ringed eye protects lines from breaking. It is absolutely perfect for attacking fish in heavy cover.

NICKEL

BLACK NICKEL

**Center Balanced Eye**  
Offers stable lure swimming action, for optimum hooking position at all strikes.

**Hi-Carbon Steel**  
Top-quality Japanese-made carbon steel, contributing to sharp and tough hook tips and dependable strength.

**Forging**  
Forged hook wire ensures higher resistance against vertical opening.

**NRB coat** NRB, Non-Reflective-Black is HAYABUSA original fluorine coating which dramatically enhances hook-set performance for the smoothness in penetration.

**Sharp Point**  
The 4.5 straight sharpened point strikes a fine balance between razor-sharp penetration and take-no-chances strength.

**Round Bend Gap**  
Superb hooking performance and firm grip once fish are on the line.

## MODEL TBL920

- ART No. EB92071 BLACK NICKEL

**Hayabusa Original Point**  
Press formed unique hook point  
Sharpness & durability Up!

TBL920, HAYA-GAKE, features short shank and wide gap designed by T.Namiki. The uniquely designed hook can penetrate mouth of fish and locks around the jawbone. Also the features minimize snagging on bottom and catching each hook attached on your lures.

MODEL

# BRUSH EASY

ART No. EX926 BLACK MATTE

Different size has different Brush Guard setting to gain utmost effect!!

**Brush Guard**

Natural appearance in the water

**Mud Black Head**

According to hook sizes, 2 different types of brush guards are designed. Size 2 has double, and size 1 has twin double. Hooks and guards are investigated carefully to have well balanced combinations.

**Hayabusa Original Point**  
Press formed unique hook point  
Sharpness & durability Up!

Gives precise action to soft plastic baits

**Short Shank**

Holds soft plastic baits tight with double keeper

**Worm Keeper**

Outstanding performance around grassy area!  
Efficient casting is possible, since the guards prevent hook getting stuck with grasses or garbage.

Also, the guards work great when anglers cast to rocky or snaggy area! Helps anglers perform efficient casting because guards prevent hooks getting stuck with rocks or snags.

## LITTLE SHAKER

ART No. EX923 BLACK MATTE

Perfected by pursuing attractive  
and appealing action!

When using jig head wacky rig, most of the time  
the plastic worm is the fulcrum to make swinging  
action. However, due to the length of regular jig  
heads, rod action could not reach the plastic  
worm effectively. The development of Little  
Shaker was focused on this.

Super low weight balance (which give a steady  
falling position and wide shaking action) and  
short shank made anglers possible to perform  
twisting or quick shaking move to plastic  
worms. Precise rod action will reach the plastic  
worms as anglers wish!  
Little Shaker makes attractive actions in short  
distance and maximize the chances of bites!!

**Hayabusa Original Point**  
Press formed unique hook point  
Sharpness & durability Up!

Super low weight balance and  
short shank hook are the secrets to  
perform twitching and quick  
shaking action. Maximizes bite  
chances in short distance!!

Holds plastic worms tight and  
locks fish mouth  
**V-Bend**

Made possible  
to achieve steady falling position,  
and wide shaking action.

MODEL

# SWIMMING950

ART No. EX930 BLACK NICKEL

The head design of Swimming 950 draw out the function of plastic worms!!

**Horizontal Ring**

Maximizes the function of plastic worms and anglers' action reaches the worm precisely.

**Head Design**

Perfect swimming position allows aggressive casting!

**Offset Hook**

Prevents worm from shifting and overcomes grassy condition

MODEL

# FPJ960

ART No. EX927 BLACK MATTE

The unique head shape reduce the chance of grasses and etc. getting snagged on the eye.

Hard material head increases the sensibility of action.

Double Ring Keeper holds any thickness or material baits.

Because of the short shank, baits gain free action as well as easier for bass to swallow them.

**Hayabusa Original Point**  
Press formed unique hook point  
Sharpness & durability Up!

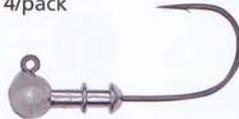

By adopting Hayabusa Original Point and wide gap hook, it will penetrate through hard mouth and reduce the chance of hook out.

**Black Matte Color :**  
Anti-glaring coating reduces the presence of hook.

# LURE

## RAMBU

### RAMBU AB

ART No. FS507

Sinking Speed(sec.)	Weight
Size:3.5 approx.3.5sec/m	18g

Body Length(mm)
105

#### Up-Eye

This lure exhibits an agile rise from the fall orientation, giving rise to short, quick darting actions. Raised eyes are used to imitate a fleeing shrimp.

#### Mighty Hook

The primary feature of this hook design is to have a wide gape for the best hook up without losing strength.

#### AB Sinker

Special specifications have been adopted for a fall orientation that oval squid cannot resist grasping and a snagless performance. In addition, custom holes are provided enabling weights to be added at the sinker part. This enables free adjustment to rapidly changing currents and the water level on a given day.

# RAMBU

ART No. EX971

2.5	75

RAMBU V3 was designed to achieve attractive steady diving and brisk sliding actions! Built-in V3 FLASH, on the belly and hind edge, makes squid crazy!!! This is a hi-spec model for modern anglers confronting tough conditions.

### V3 FLASH

V3 Flash on the belly and hind edge reflects light mysteriously. It makes a strong appeal to squid.

超動餌木  
乱舞  
RAMBU  
V3  
乱舞三代目

### Fixed Line Eye

Fixed Line Eye is set for anglers to perfectly control over the lure. It also avoids an inefficient action to achieve a brisk dart action.

### Ride-on Sinker

Ride-on Sinker makes it possible to long casting and attractive falling positions.

### Slim & Edgy Body

The Slim & Edgy Body creates long darts even with a light action through a wide range of water.

### Mighty Hook

The primary feature of this hook design is to have a wide gape for the best hook up without losing strength.

MODEL **Jack eye SHOT**

ART No. FS412

Weight

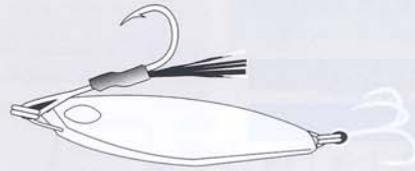

20g	30g	40g	60g
-----	-----	-----	-----

Weight Body Length(mm)

20g	54
30g	62
40g	69
60g	80

Jack eye SHOT has an assist hook on the front and a treble hook on the rear as standard features via high-strength split rings so that it can be used "as-is" with confidence.

With jerking, it does not swing too wildly and has reduced the effect of winding up resistance. A stable position is kept, so bite chances are not missed. With straight retrieve, it is possible to search at a fixed level with a stable position and a wobbling action.

While falling, it flutters like a tree leaf and attracts bites due to the flashing effects.

5g	32
7g	39
12g	47

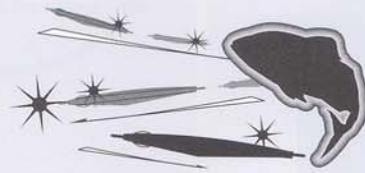

The triple features of a light-catching flatted shank, aurora threads, and holographic tinsel make a strong appeal.

A wavering action is achieved with the design which fends off water with the flat part and creates turbulent current with the slip part.

This bait creates an irregular action with straight retrieve while wobbling in both directions to the left and right; thus, it keeps appealing to fish.

Jack eye's features of the big eyes and the glittering body provide an extremely attractive appearance.

The bait fish like shape also serves as a stimulus to predatory instinct of fish. The hind side of the body has a thick width in order to gain the perfect center balance. This feature allows the bait to have the both of great swimming ability and an irregular sideways action.

Efficient dart action with a little rod action!!

Jack eye STRUSH is a vertical metal jig with quick response time.

It is suitable for any kind of water condition, and smooth control over the jig is achieved during jigging with the center balanced body.

The straight edge, running from the head to the center tail, and the winding edge, on the other side of the body, create two different water stream that makes lively swimming and an irregular falling action.

200g	110
250g	120
300g	130

Jack eye SLOW supports a jerk action using the repelling power of the rod. It is a characteristic of slow jigging.

Immediately after jerking, it faces to the side, leading to the subsequent fall.

It also falls in a zigzag pattern while wobbling just like a tree leaf.

The fall position and the powerful flashing of holograms increase the chance of a bite.

This high-response vertical metal jig has a long shape and flat body and produces a powerful flashing effect. It is designed with a center of gravity slightly shifted to the rear which provides a smooth action with reduced dart, facilitating easier bottom fishing. During falling, it appeals to the target with the flashing effect of its irregular sliding action immediately after hitting an obstacle.

20g	50
30g	65
40g	75
60g	85

When retrieving, the thin-body squid bait moves in a swinging, life-like way, and stimulates the predatory instincts of the target. When retrieving, the body stands straight in the swimming direction, so its silhouette can be clearly seen by the target. The tail part produces a complex water current and converts it into a wobbling action.

When retrieving, the body stands straight in the swimming direction, so its silhouette can be clearly seen by the target.

The tail part produces a complex water current, and converts it into wobbling action.

Depending on the retrieve speed, it is possible to search every range from directly below the water surface through the intermediate range to the bottom.

When it falls, it flaps with a regular action due to the effects of water currents on its belly side. The body's flashing and the tempting action of the squid bait appeal to the target and provoke bites.

Repeated lifting and falling actions near the bottom is especially effective for targets such as Rock fish and flat fish.

**Jack eye Kick Bottom**  
(for Inchiku fishing)

Inchiku fishing style has a long history. Inchiku lures were first made by Japanese fishermen many years ago. It still remains as one of the most popular fishing methods in Japan and is well-known all over the world.

#1 Pink Sardine #2 Blue Sardine #3 Hybrid Sardine #4 Chili Pepper #5 Silver #6 Gold #7 Red & Pink #8 Tropical #9 Glow Pink

**What is Inchiku fishing style?**

It is one of the simplest forms of fishing. The way of using Inchiku is much easier than the most fishing styles.

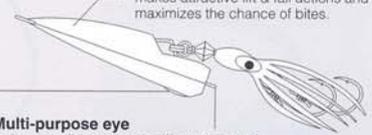

**How to use Inchiku**

1. Drop Inchiku to the sea bottom.
2. Wind the line (roughly 10 meters from the bottom).
3. If there is no response, drop it to the bottom again. Just repeat this action. That is all.

**Advice**

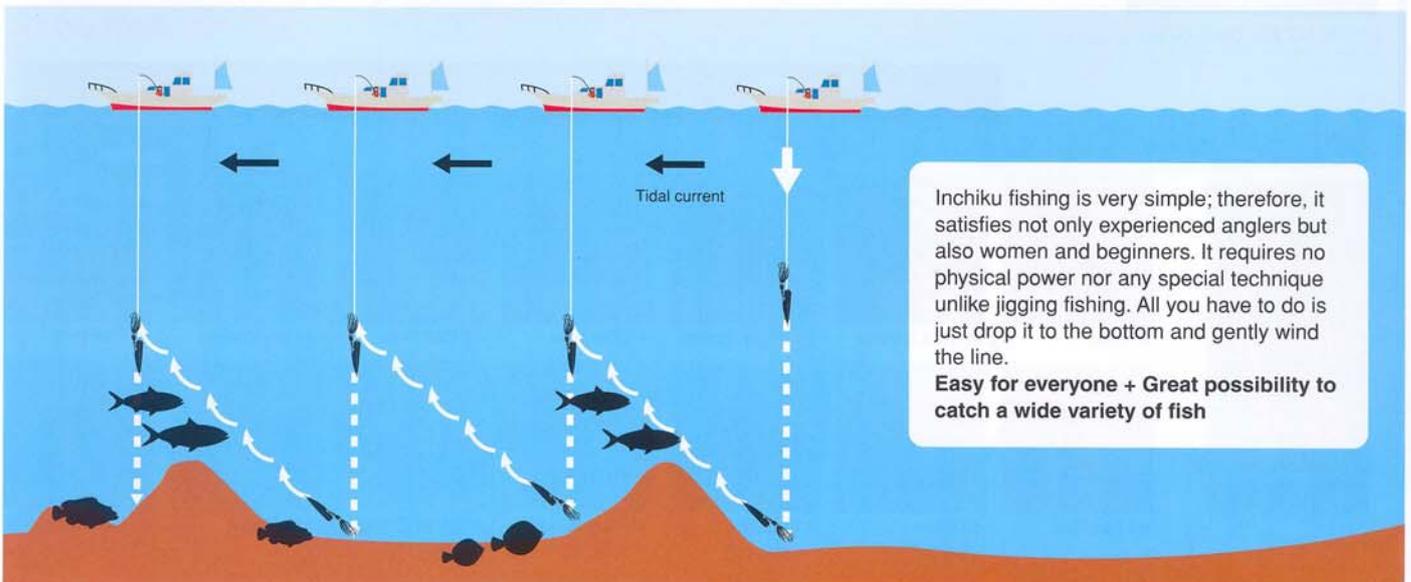

To wind the line at constant speed is important for Inchiku fishing. Notice that the speed of winding the line should be adjusted depending on the given condition. The followings are just a few examples of fish you can get with the Inchiku fishing; sea bream, yellow tail, cod fish, snapper, flounder, and the other rock fish!

**Special spear-head shape** makes attractive lift & fall actions and maximizes the chance of bites.

**Attractive big eye** strongly attracts fish and triggers bites. It is also a great bite spot.

**Multi-purpose eye** makes possible to attach different kinds of hooks and blades and to choose the right one based on the weather and water conditions.

Inchiku fishing is very simple; therefore, it satisfies not only experienced anglers but also women and beginners. It requires no physical power nor any special technique unlike jigging fishing. All you have to do is just drop it to the bottom and gently wind the line.  
**Easy for everyone + Great possibility to catch a wide variety of fish**

# FREE SLIDE

OFFSHORE

If you can detect bites while falling your bait, you can catch more.

FREE SLIDE can be adapted to any fishing conditions.

Your choice and quick adjustments of baits are essential to adjust to frequent changes of depth and tidal current.

This makes possible to change hooks & rubber easily even on a boat.

ART No. SE125

Hooks	
CHN 122 #3	Black Nickel

**Advantages of FREE SLIDE**

It does not make uncomfortable feeling for target fish since the head and the rubber fall separately.

After setting the hook, fish has no chance to escape. When the fish shakes its head, the head of FREE SLIDE steps away from the fish. This prevents fish from coming off.

HEAD

Free Slide Rubber Hooks

It is suitable for all round fishing. With the changes of depth and current, anglers can easily and quickly change the combinations of heads and rubber to adapt various conditions.

Rubber falls slower than the head; therefore, it strongly attracts fish even in tough conditions.

[Head] [Rubber] can be separately changed depending on your choice!

**The best advantage: You can use it both with natural baits (such as sand worm, sliced fish, and squid) and without it as a lure. If you lose the natural bait, the rubber itself still attracts fish.**
